**MONTHLY WEATHER REPORT**

**THE WEATHER IN OCTOBER 2025**

**General Weather Conditions:** The weather in October was relatively hot and dry. Unstable weather conditions occurred on the 2<sup>nd</sup>, 7-9<sup>th</sup>, 12<sup>th</sup>, 21-22<sup>nd</sup> και 24<sup>th</sup> of the month, which caused local rains and isolated thunderstorms in the mountains. The average temperature for the month was 0.5°C above normal and the average rainfall was 1.8mm or 40% of normal.

**Severe Weather conditions:** On the 7<sup>th</sup> and 8<sup>th</sup> of the month, heavy rains and isolated storms as well as strong winds occurred mainly in northwestern Cyprus, in the Paphos district. A hotel and a roundabout area were flooded, while minor problems were also noted in EAC cables.

**Precipitation (normal period: 1961-1990):** According to preliminary calculations, the average rainfall in October was 14.3mm or 43% of normal. The average rainfall ranged between 2% (Vyzakia) and 194% (Stroumbi) of normal for the month.

**Temperature (normal period: 1981-2010):** The mean air temperature for the month was approximately 0.5°C above normal. The mean daily temperatures were above or very close to normal throughout the month except for the period 6<sup>th</sup>-15<sup>th</sup> of the month, where temperatures were below normal mainly inland and over the mountainous areas. The daily maximum temperatures exceeded 29°C in Athalassa in 21 cases, in Larnaca they exceeded 28°C in 19 cases, in Paphos they exceeded 27°C in 9 cases, while in Prodromos they exceeded 19°C in 22 cases. Most stations recorded their highest maximum temperature on the 1st, 3rd, and 4th of the month and their lowest minimum temperature on the 10th and 13th of the month.

The 5-day averages of air temperature and their deviations from normal at various places are shown in Table 1 and the extreme temperatures are shown in Table 2.

# OCTOBER 2025

## FIVE - DAY TEMPERATURES AND DEVIATIONS FROM NORMAL (°C)

### Preliminary Data
